Slightly More Modern US IED

How to Install ?

OpenIV.
Now once you have opened up OpenIV to GTA V, navigate to the following path,
x64e, models, cdimages, weapons,rpf. Now drag the w-ex-pe.ytd and w-ex-pe-hi.ytd from the winrar file into that weapons.rpf file. And you're done!

For FiveM you will have to make a folder named whatever (eg. stckybom) you want and put it in your resources folder, next make a folder inside of the folder you just made named "stream" now insert the files from this mod into that folder, now make a file in that "stckybom" folder named "__resource.lua". Now add to your server.cfg, "run stckybom"
